PREAMBLE

This body, in drafting the Constitution and By-laws for the federation of states, intends that a basic format of government must exist for the benefit of all archery. We ask that all state associations abide and conduct themselves within its framework. In addition, this body recognizes the sovereignty of each state to promote individual programs to create more archers and memberships.

A. General

1. A conventional bow of any type may be used provided it subscribes to the accepted principal and meaning of the word “bow” as used in archery competition, i.e., an instrument consisting of a handle (grip) riser and two flexible limbs, each ending in a tip with string nock. The bow is braced for use by a single bowstring attached directly between the two string nocks only. In operation it is held in one hand by the handle (grip) riser while the other hand draws, holds back and releases the string. In the case of physical disability of the arms or hands, a chew strap may be used in place of fingers or release aids.
2. Compound bows may be used, provided:
 - 2.1 Basic design includes a handle riser (grip) and flexible limbs.
 - 2.2 Total arrow propelling energy is developed from a flexing of the materials employed in limb construction.
 - 2.3 Weight reduction factor is of no consequence.
 - 2.4 Bows which develop any portion of arrow propelling energy from sources “other than the limbs” shall not be allowed. This is not to be construed to mean that compound bows which employ other sources of arrow propelling energy, not specifically listed in this paragraph, will be allowed.
 - 2.5 The cables of the compound bow shall be considered as part of the string and all applicable string rules except color requirements shall apply.
3. The maximum peak draw weight allowed in NFAA competition shall be 80 pounds, with a maximum speed of 280 FPS with a variance of 3%.

Those archers who had been shooting from the right side shall shoot from the left side and those who had been shooting from the left side shall shoot from the right side. If you shot bottom targets you will switch to the top and if you shot top you will switch to the bottom.
 - 2.2 The archer must straddle an imaginary shooting line, which is marked by the distance stake and parallel to the target face, while shooting the required arrows. No archer may advance to the target until all arrows have been shot by the group, except for yardages that are 32 yards or less and when there are more than four archers in a group on 35 cm. targets or smaller. Archers may elect to shoot at a clean target after all previous shooters in the group have shot and had their arrows scored.
 3. When shooting at butts with multiple target faces, the first 2 shooters will shoot the bottom target faces. When target faces are placed side by side (i.e. 50 cm.) the archer on the left will shoot the left target face; the archer on the right will shoot the right target face.  4. One group shall not hold up the following groups while looking for lost arrows. Enough arrows shall be carried so that each archer may continue shooting, and return later to find missing arrows. If one or more open targets in front and two or more groups back up, the delaying group shall allow backed up groups to shoot through.
 5. No archer may practice on any shot of a course to be used for tournament shooting later the same day. Special practice targets should be supplied. The first target of each round may be used as practice at the discretion of the tournament chairman. The maximum number of arrows allowable will be determined by the round being shot.
 6. An archer leaving the range for any reason other than an emergency situation or an equipment failure may be privileged to return to his/her group and complete the unfinished round or subsequent rounds. He/she will not be privileged to make up any arrows missed in

the interim. If deemed an emergency, or an equipment failure, then in the presence of the tournament official he/she will be allowed to shoot missed targets.

7. In the case of an equipment failure the archer may have the needed time, as granted by a tournament official, for equipment repair or replacement and may shoot arrows required to assure that the proper sight settings are accurate, within the 45 minute maximum time limit. 14. A disabled archer shooting from a chair or wheelchair will place the chair legs or wheels straddling the distance marker or shooting line.

I. Scoring:

1. All arrows must remain in the target butt until all arrows are scored. In all NFAA Rounds, an arrow shaft need only touch the line to be counted in the area of next higher value. They may then be withdrawn.
2. The status of all arrows shall be determined and recorded before touching or withdrawing any arrows from the target butt.
3. The target group, which generally consists of four archers, will select a score caller, two scorekeepers, and a target captain. The target captain shall be the judge of disputed arrows on his/her target. In the case of a group of three archers, a scorekeeper will also be the target captain. When a captain's arrows are in question, the majority of the group shall decide the status of the target captain's arrows. When a line judge has been appointed by the tournament director and an appeal is made to the line judge, the line judge's call will be final.
4. Off-ground skids or glances into the target shall not be counted. Arrows striking objects over the shooting lane may be re-shot.
5. Arrows passing through the face, but still in the butt, may be pushed back and scored as hits in the circles through which they went. This does not mean that they may be withdrawn and then stuck back through the target.
6. Arrows believed to have passed through the target may be re-shot with marked arrows, which will not be scored if the doubtful arrows are found in the butt.
7. Unsuspected pass-throughs: in any instance where arrows are found to have obviously passed through in such a manner they cannot be properly scored and their location and the condition of the butt convince the target captain that the arrows did indeed pass through a scoring area, the archer may return and re-shoot from the obvious distances or furthest distances involved.

8. Witnessed bounce outs, believed to have hit the target in the scoring area, will be re-shot.
 9. In any tournament where the method of shooting off a tie is not decided in advance, ties shall be decided by shooting the first three (3) targets. In any tournament where field faces are involved, field faces shall be used. If a tie still exists after three targets, continue from target to target until the tie is broken.
 10. An archer who shoots arrows at the target in excess of the prescribed number shall lose the arrow or arrows of higher value in all NFAA rounds. A penalty of one point will be assessed for each arrow shot over the prescribed numbers.
 11. Any arrow(s) shot from other than a pre-designated position in the designated order shall be scored as "0" (zero).
 12. A dropped arrow is one which falls while being transferred from the quiver to be nocked on the string, or in preparation for a shot; or which falls from the string during a controlled letdown. (A dropped arrow may be re-shot).
 13. Scorecards must be signed as correct by scorekeeper and archer. Once submitted a scorecard cannot be retrieved for purposes of changing totals. An archer who has signed and submitted a scorecard as correct which has incorrect total(s) may be disqualified.
- J. Awards:
1. At Sectional and National Tournaments, awards shall be given for 1st, 2nd, and 3rd in all divisions and styles. At state level and below the unit system may be used. The unit rule is defined as follows: One award for one through three archers. Two awards for four through six archers. Three awards for seven or more archers in a class.
 2. At National and Sectional tournaments, archers must complete the prescribed number of targets for the tournament to be eligible for an award. No award can be won with an incomplete score, except in the case of emergency.
 3. Archers awarded the temporary custody of prizes and trophies shall be responsible for their return in good order to the Executive Secretary at least two weeks before the next annual tournament.
- K. Use of Handicaps:
1. All handicaps as provided under "Handicapping" shall be recognized.
 2. The NFAA shall issue official NFAA handicap cards.

ARTICLE V

The NFAA Handicap

- A. General:
1. Essence of the NFAA Handicap System. Handicapping is the great equalizer among sportsmen of differing abilities. The National Field Archery Association presents this archery handicap system in the conviction that, when faithfully operated, it results in equitable handicaps no matter where archers live and play. The handicap system does not exclude the use of both handicap and/or scratch shooting in the same tournament. The national system of handicapping must meet two main requirements, which are:
 - 1.1 Simple enough for operation by the small, modestly equipped club as well as the largest state association.
 - 1.2 Thorough enough to produce fair, uniform handicapping the country over.
 2. Handicap Name:
The handicap produced by this system is termed an "NFAA Handicap". Such a handicap should be identified on a card or elsewhere as "NFAA Handicap" or as "Computed under NFAA Handicap System".
 3. Purposes:
 - 3.1 Provide fair handicaps for all archers, regardless of ability.
 - 3.2 Reflect the archer's inherent ability as well as his recent scoring trends.
 - 3.3 Automatically adjust his handicap down or up as his game changes.
 - 3.4 Disregard freak low scores that bear little relation to the archer's normal ability.

- 3.5 Make it difficult for the archer to obtain an unfairly large handicap increase at any revision period.
 - 3.6 Make a handicap continuous from one shooting season to the next without need of adjustment.
 - 3.7 Encourage the archer to keep his game near its peak.
 - 3.8 Establish handicaps useful for all archers, from championship eligibility to informal games.
 - 3.9 Make handicap work as easy as possible for the handicapper.
- B. Establishing a Handicap:
1. An archer's handicap shall be computed on the official NFAA field and/or hunter round, and shall be computed by the following table:
Best score of 2, scores 80% of average differential.
2 best scores of 5, scores 80% of average differential.
3 best scores of last 7, scores 80% of average differential.
The first and second methods shall be computed only for those archers who have not recorded the minimum of seven scores need for a full handicap.
 2. An archer's handicap shall be derived only from those scores shot within the last twelve (12) months.
 3. All handicaps must be established during a tournament held on official NFAA targets, approved NFAA 2-Star Ranges or higher, and where official NFAA field or hunter rounds are shot.
 4. The differential is the difference between the actual average and perfect. (Example: Last 7 scores are 430, 415, 440, 440, 450, 460 and 410. The best 3 scores are 440, 450 and 460. Average = 450. 560 minus 450 = 110. 80% of 110 equals 88, which is the handicap.)
- C. Handicap Procedure:
1. A new archer, or one who holds an expired handicap card, shall be issued a handicap card in the most expedient manner upon the payment of established fees, and must shoot two official scores to establish handicap.
 2. No archer shall be issued a handicap card unless the archer is a member in good standing of the NFAA and a state association chartered and recognized by the NFAA.
 3. Each person will be responsible for keeping a current handicap in the proper place on the handicap card.
 4. If a person shoots more than one style, he must be handicapped in each style.
- D. Handicap Cards:
1. All official handicap cards shall be printed by the NFAA. The card shall have provisions to indicate NFAA State and Club Membership, all styles of shooting, and shall provide space for recording scores for all recognized styles of shooting.
 2. Handicap cards shall be issued by the NFAA, upon receipt of dues from member.
 3. Handicap shall be concurrent with membership, i.e., expiration of membership in the NFAA shall void handicap.
 4. Handicap card shall be issued by the NFAA in conjunction with direct NFAA membership applications, provided an affiliated state association exists in the area where the archer resides.
 5. The handicap and membership card shall carry the full name, address, date of birth (if under the age of 18) and affiliated state of the archer.
 6. Handicap and membership cards of military personnel in transit or on temporary duty shall be recognized.
- E. Scores to be Recorded on Handicap Cards:
1. All scores recorded on the handicap cards shall be the actual scores for the field and/or hunter rounds.
 2. All scores shot in tournaments using field and/or hunter rounds may be recorded.
 3. All recording on the handicap card shall be on the basis of each 28 targets, i.e., a tournament of 28 targets field and 28 targets hunter – each score is to be recorded. If a 14

field and 14 hunter – the combined total shall be recorded. If a 28 field and 14 hunter – the round that is completed shall be recorded. No fractional round shall be recorded.

F. Lost or Misplaced Handicap Cards:

1. An archer who has been handicapped but cannot submit a handicap card or statement from his club secretary showing his/her true handicap is required to compete without handicap for that tournament.
2. An archer may not submit club secretary evidence of handicap to the state handicap officer or NFAA board member for more than 14 consecutive days. The archer must apply for a replacement handicap and membership card. The application must be accompanied by the fees established by the NFAA and the state association. The replacement card shall run concurrent with his/her previous card as recorded in the records of the state association and/or records of the NFAA.

G. Administration of Handicaps:

1. Handicap shall be administered through the state association chartered and recognized by the NFAA. If no chartered or recognized association exists, the NFAA shall administer the system.
2. The state association shall maintain a satisfactory control to insure that handicap is properly administered.
3. The state associations shall agree no archer is denied a handicap card upon proper application and payment fees, regardless of race, creed or color.
4. The state association shall agree that no member in good standing with the NFAA is denied a handicap card.
5. State associations may not impose additional requirements for handicap.
6. Non-compliance with these requirements shall be grounds for immediate suspension of recognition by the NFAA. The state association must submit within 30 days a brief, showing cause why the offending association's charter and recognition should not be revoked by the NFAA Board of Directors Council.
7. The use of non-official targets shall not be construed as a permissive to negate the provisions of the handicap article.

2. Targets:

- 2.1 The targets for this round are animal targets with the scoring area divided into two parts. The high scoring area is oblong while the low scoring area is the area between the high scoring area and the “hide and hair” line or “feathers”, as the case may be. The area between the “hide and hair” line to the outside of the carcass is considered a non-scoring area. A bonus dot (valued one point) is located in the middle of the high scoring area and colored white on dark targets and black on light targets. This bonus dot will be mandatory at NFAA National and Sectional Field Championships and optional at other events..
- 2.2 The high scoring area of Group No. 1 (plus or minus 1/8”) is 8 ¾ inches wide by 14 ¼ inches long with rounded ends. 3.6 Each target in Group 4 is one distance. There are four targets in Group 4. All arrows shall be shot from each of the four stakes from distances selected between 20 yards and 10 yards. If the targets posted are different, the archer may shoot any target presented, even including a target that has been shot by another member of the group. In this instance the archer must declare his choice.

4. Shooting Rules:

A maximum of three marked arrows may be shot, in successive order, and the highest scoring arrow will count. In the case of walk-up targets the first arrow must be shot from the farthest stake, the second arrow from the middle stake, and the third arrow from the nearest stake, in order to be scored. No archer shall advance to the target and then return to the stake to shoot again in the event of a missed arrow.

5. Scoring:

5.1 21, 20 or 18 for the first arrow
17, 16 or 14 for the second arrow

(4 arrows at each distance)

At the following four position shots, each arrow will be shot from a different position or at a different target:

35 yards at a 50 cm. target, all from the same distance but from difference positions
45, 40, 35, 30 yards at a 50 cm. target
65, 60, 55, 50 yards at a 65 cm. target
30, 25, 20, 15 yards at a 35 cm. target
35, 30, 25, 20 feet at a 20 cm. target

2. Targets: Use Championship field targets.

3. Shooting Positions:
The prescribed distances in Subsection 1 of this By-law are to be adhered to without variation. Each NFAA Chartered Club with an approved field course shall mark the distances on the shooting positions. In laying out the course any order may be used as necessary to fit the terrain.
 4. Shooting Rules:
Each archer shall shoot four arrows at each of the fifteen target layouts in a unit. In ten cases this shall mean shooting the four arrows from a single stake at a single target. In the other five it may mean either shooting one arrow from each of four stakes at a single face, or it may mean shooting all four arrows from a single stake but at four separate faces.
 5. Scoring:
 - 5.1 The scoring is five points for the spot, four for 2 white scoring areas, and three for the outside black scoring areas. The X-ring is used for tiebreakers only.  2. Targets: Use the Championship Hunter Round targets.
 3. Stake Recommendations:
Where one stake is used, a stake at least eighteen inches above ground is recommended. On the two-stake shots, use stakes that extend twelve inches above ground, and stakes that are not over six inches above ground for the four-stake shots. Such an arrangement will help eliminate a lot of confusion.
 4. Shooting Rules:
In shooting the Hunter Round the archer will observe the following shooting positions:
 - 4.1 1 stake – Shoot four arrows from the same stake.
 - 4.2 2 stakes – Shoot two arrows from each stake.

- 10.2 Scorecards will be picked up at registration, or a designated area, prior to each round of competition. This is usually forty-five (45) minutes before starting time at pre-tournament meeting announcements. Each shooter will receive two (2) score cards for each round. All information on each scorecard must be filled out and correct.
- 10.3 Each group will designate two (2) members of their group to call scores and two (2) members to record the scores. (If the group has only three (3) shooters, only one (1) will call arrows). Archers will draw for the shooting order in their respective groups and rotate the shooting order.
- 10.4 All arrows must remain in the target and should not be touched until all arrows are scored. The arrow shaft must touch any portion of the scoring ring, regardless of deformity of the scoring rings or angle of the arrow in the target to be scored the higher value. The status of any questionable arrows must be determined before removing any arrows from the target. If both score callers agree, the score called is final. If there is disagreement in the designated callers, a third caller from the group other than the archer whose arrow is in question will make the final call. If a questionable arrow exists in groups of three, the designated caller will make his call. If the archer whose arrow is in question does not agree, he may have the third party make the final call. In all cases the third call is final.
- 10.5 Score callers will judge and score each arrow and call out the results to the scorekeepers. This will be recorded on the respective shooters scorecard. Running scores can be checked during the progression of the round to eliminate errors.
- 10.6 Both completed scorecards must be totaled and signed as correct by the score keepers and the shooter and turned in at the assigned area. Each shooting group must turn in their scorecards together (except when a shooter is permitted to make-up targets due to equipment failure or other approved leave of emergency). Any individual or group that does not turn in their cards before leaving the range (taking cards with them) will receive a score of "X" for that day's score. "X" will be used instead of the number (0) on all cards, symbolizing "NO SCORE".
- 10.7 Arrows passing through the face, but still in the target, will be pushed back and scored.
- 10.8 Any arrows deflected by a foreign object or miss fired will be scored where it lies.
- 10.9 Any arrow embedded in the nock of another arrow (generally known as a "Robin Hood") will be scored the same as the arrow it struck and skewered, even if it falls to the ground and not in said target.
- 10.10 Arrows in corresponding areas of the target will be scored with point values as follows:
12 – Highest Score
10 – 2nd Scoring Ring
8 – 3rd Scoring Ring
5 – Outside Scoring Area (ANTLERS AND HORNS, NO SCORE)
"X" – NO SCORE

- 10.11 All tied scores will be broken by the number of 12 Rings; except in the case of a first place tie. When this occurs, a sudden death shoot-off will take place. All shooters tied for 1st place will shoot one (1) arrow. The arrow which is determined to be the closest to the 12 ring will be declared the winner. If two shooters tie by being the same distance to the 12 ring, they will shoot until the tie is broken. This will be true for all classes. If competitors are not present, ties will be broken by Rule of First Points dropped. [If possible use same ranges when comparing cards to break ties].
- 10.12 A witnessed bounce-out will be re-shot. If an arrow is shot at a target and is suspected by the archer or the group as a pass-through then proceed by letting the next archer in order shoot. Archers not standing at the stake should always observe where the arrow strikes the target for this reason. When all shooters of a group have completed shooting, one (1) "scorer" may proceed to the target to see if there was a pass-through or if the arrow is embedded in the target. If it is embedded in the target, he will request the group to come to the target, and observe pushing back the arrow to score. If the arrow has passed-through, then the "scorer" has to return to the group so the archer can shoot another arrow at the target to score. As soon as possible, tell Range officials which target you had a pass-through on, so it can be replaced or repaired.
- 10.13 After shooting the last arrow, the group shall stand together away from the shooting stake if shooting in close quarters. This will let others know you are through. When it is safe, all shooters are to proceed to the target to score all arrows before any arrows are pulled from the target. If any shooter pulls arrows from a target before the score callers and the scorekeepers can officially record them to the cards by sight, that shooter automatically receives an "X" for said target.
- 10.14 In consideration of time, no shooter will glass the target while standing at the shooting stake after shooting their arrow. Shooters may glass the target prior to shooting, but still be reminded of the time factor restrictions. After assuming their position at the stake, 2 minutes are allowed to shoot one (1) arrow. The shooter will receive a verbal warning from the group for the first offense. Second warning will be a five point (5) penalty from target score, but no less than an "X". Each subsequent offense will receive same (5) pt. penalty but no less than an "X".
- 10.15 An arrow inadvertently dropped while transferring the arrow from the quiver to the bow in preparation of a shot or an arrow that falls off the arrow rest or accidentally releases from the string in preparation of making a shot may be recovered if within reach of the archer from the appropriate shooting stake.
11. **EQUIPMENT FAILURE:** An archer declaring equipment failure, verified by the group may leave the range to report the equipment failure to a tournament official. Upon reporting to an official, the archer will have forty-five minutes (45) to make necessary repairs or replacement and re-sight the repaired equipment. The archer will then rejoin the original group and continue shooting the remaining targets. All targets missed will be shot under make up rules with a scorekeeper and witness. Any equipment failure that results in an arrow being released toward a target will be scored as it lies, a missed target may not be re-shot. Each archer is limited to one (1) equipment failure per tournament. If a second equipment failure occurs, the archer will remain with his or her group to act as a scorer or scorekeeper.
12. **BINOCULARS and RANGE FINDERS:**
 - 12.1 Binoculars and spotting scopes will be allowed. They may be checked at random by tournament officials or individuals in your shooting group. You may ask to check theirs as well.
 - 12.2 If any marks are deemed inappropriate by an official, the glasses will be confiscated and presented to the Tournament Director and committee for examination. In addition, any binoculars and or spotting scopes that have been

- pro-marked by the factory and are being used by the shooter as a range finding device, will be confiscated and will be presented for review to the tournament committee. Penalty for this if found guilty will be disqualification.
- 12.3 On unmarked ranges, no range finders are allowed. On marked 3-D ranges, range finders would be allowed if announced and advertised as to be used. This would be left as an option to the Tournament Officials.
- 12.4 An archer may not hold any equipment in line with the target for use as a range finder, and after an archer has set his/her sight, may not let down and re-set the sight. A verbal warning may be given from the group for a first offense. A second offense may be assessed a penalty of 5 points by the group. Each subsequent offense may be assessed a 5 point penalty.
13. **PROCEDURE FOR FINDING LOST ARROWS:**
As a safety consideration, and to insure a timely competition, no archer will go behind a target to look for a lost arrow, unless you can see it at time of scoring. Always keep at least (2) two archers in front of target to insure that no other group will shoot said target while you are retrieving the arrow. If you cannot visibly see the arrow, make a note to return with a range official, after the completion of the round.
14. **CLASSES AND DIVISIONS:** Equipment for 3-D is in accordance with existing NFAA Style and Division equipment rules.
- 14.1 National Unmarked, Sectional and State (optional) Marked and Unmarked Youth and Cub maximum distances.
- | | |
|--------------|---|
| YOUTH | Marked maximum – 45 yards
Unmarked maximum – 40 yards
Stakes = Blue |
| CUB | Marked and Unmarked maximum – 25 yards
Stakes = Black |
- 14.2 Adult Traditional archers shoot Blue Stakes.

- D. League Regulations:
1. League Sanction: Is provided for a continuous league period. Individual archers or teams may be added after the league has started, provided applicable forms and sanction fees are submitted.
 2. Eligibility: League shooting will be open to all archers. Individual membership requirements may be imposed by the host organization in accordance with regulations of the state association to which it is affiliated.
 3. Targets: The official NFAA Indoor League target shall be used in all league sessions.

4. Teams: The number of archers on a team will be decided by the league membership at the initial league meeting. An archer may transfer to another team with approval of both team captains and the Board of Directors.
5. Late Joining Teams: If necessary, teams may be added. However, in team standing, new teams will be scored as losing all previous series.
6. Handicap Systems: Either team or individual handicap may be selected by preference of the league membership.
 - 6.1 Team handicap will be computed at 80% of the difference in the average scores of any two teams that will compete against each other in a league series. These handicap points will be given to the lower scoring team before the series begins.
 - 6.2 Individual handicap will be computed at 80% of the difference between an archer's average scratch score and perfect. These handicap points will be given to each individual before a series begins.
7. Team Points: In league play there are four possible points to be won in a three game series. One point is earned for each game won and a team having the higher series total wins one point. When two teams have tie scores for a game, each team wins ½ point.
8. Average: An archer's average will be computed weekly from the average of the last six games shot. During the initial league series each archer's high game and low game will be discarded and the remaining score used as the average in determining team points. The same procedure will be used during the second league series, but thereafter will revert to a six game average.
9. Late Joiners or Alternate: Averages for late joiners or alternates without established averages will be computed in the same manner as described in paragraph 8, above.
10. Handicap: An archer's handicap will be computed weekly from the average of the last six games shot. 80% of the difference between 100 and the six game average will be the handicap. During the initial league series the high game and low game will be discarded and the remaining score will be used as the average in computing the handicap. The same procedure will be used during the second league series and for averages for late joiners or alternates without established handicaps.
11. Absent Team Members: A certain number of team members must be present to compete. Having fewer than the minimum required will result in forfeiting the series. The minimum of archers present for four member teams will be two; for three member teams, one; and for two member teams, one.
12. League Alternates: Several alternate or substitute archer procedures may be employed. The system selected is left to the preference of the league membership. Once the league has adopted a system there must be no variation unless the league Board of Directors has voted a change.
 - 12.1 A list of league alternates may be on file with the league secretary. Any archer so listed will be eligible to fill in vacancies on any team in the league.
 - 12.2 Each team may carry an additional team member as an alternate. In this instance, the alternate may shoot only if vacancies exist on his team.
 - 12.3 A league may elect not to allow any type of alternate rule.
13. Absentee Score: A league may elect to allow absentee scores in lieu of or in addition to its alternate rule. An absentee score must be witnessed and may not exceed the archer's average. Points above his average will be dropped.
14. Blind Scores: A blind score may be used for a missing order. It will be determined by subtracting five points from the archer's average score. This blind score will be used for each game in the current series. Blind scores should not be used for computing future averages.
15. Late Arrival: A team member arriving before the second game has started may participate in the balance of the game but their score for the first game will revert to blind score procedure. Arrival after the second game has started will disqualify them and blind score procedure will be used for his series.

16. Divisions of a League: The league period will be divided into first and second halves. All teams will start the second half with zero wins and losses. Individual averages and/or handicaps will be carried into the second half.
 17. League Championship: A shoot-off, one three-game series, between the winner of the first half and the winner of the second half shall decide the League Championship.

Averages and/or handicaps will not be re-computed for the purpose of shooting off ties.
- E. Shooting Rules:
1. Team Captain: Each team will select a team captain from its members. The team captain shall be responsible for the attendance of the members of their team and for their behavior at all league sessions. They will collect all shooting fees, including those of tardy members, and submit them to the league secretary. They will direct the shooting order of their team; appoint an archer to score and pull the opposing team's arrows and another to record the scores. They shall check and initial score sheets at the end of each session and submit them to the league secretary.
 2. Target Order: The score sheets will indicate which butt and lane (left or right) where each team will shoot. The first two left lane archers will shoot the top left targets and the last two will shoot the lower left targets. The first two right lane shooters will shoot the top right targets and the last two, the lower right targets. Lane assignments will be changed each week to insure a fair rotation.
 3. Alternation of Shooters: After the completion of six ends, teams shall change lanes and targets. Archers who shot top targets on one side will shoot bottom targets on the other side, etc.

Sanction shall mean that said round is conducted by the NFAA or through its recognized state affiliate; when said round is held on a NFAA approved facility using official NFAA targets; and when said round conforms to Articles I, II, III, IV and VI of these By-laws.
 - 2. An archery club having a minimum of five (5) Head of Household members, meeting requirements in NFAA Constitution Article III, Section A, Paragraph 2 or 3, may be chartered with the NFAA upon approval of the state association and the NFAA Director who has jurisdiction. A club/shop charter may be granted by the NFAA only after prior approval of the state association and NFAA Director. No state association shall approve an application for charter unless the club/shop meets minimum state requirements.
 - 3. Application for charter will be made in triplicate, and along with the proper fees, shall be forwarded to the state association secretary. After approval by the state association all three copies will be forwarded to the NFAA Director for review. Upon granting his approval the NFAA Director will affix his signature, forward one copy to NFAA Headquarters, return the second copy to the state association secretary, and retain the third copy for his records. Upon receipt of properly executed application and charter fee at NFAA Headquarters the Executive Secretary is authorized to issue the charter. Effective date of the charter will be shown as the date of approval by the NFAA Director.
 - 4. A newly chartered club will pay a \$25.00 fee to charter with the NFAA and have a Constitution and By-laws that is in compliance with the State requirements. A newly chartered Shop will pay a \$25.00 fee to charter with the NFAA. After establishing charter, continued affiliation will be maintained through the state association and the NFAA Director.

Upon receipt of the approved renewal form and renewal fee at NFAA Headquarters, their charter will be extended for an additional year. If a Club/Shop changes their Constitution and By-laws within the year they will send a copy along with the charter renewal to the State Secretary and the NFAA Director. Failure to renew their charter by the last day of the

month in which the club/shop charter expires, shall result in the club/shop being dropped from the active rolls of NFAA.

6. A club/shop dropped from the NFAA due to lapse of current charter, shall forfeit its right to hold NFAA sanctioned tournaments. Its NFAA course approval and its NFAA club liability insurance shall be suspended until the Club/Shop Charter has been reinstated.

B. Course Approval Procedure:

1. The NFAA recognizes as official only tournaments held on NFAA approved courses and makes no awards for competition on any other course. The NFAA Director, or his designated representative must inspect courses. Any one that is designated to represent the Director must be a member in good standing of the NFAA.
2. Any NFAA chartered club/shop having a range will have it inspected for safety by the NFAA State Director or his designated representative every two years. When inspecting a Bowhunter range the NFAA Director will use the course layout regulations and the safety regulations that pertain to a marked or unmarked Bowhunter range.
3. To get a course approved, by the NFAA, the club secretary/shop manager must contact the NFAA Director for that geographical area. The Director will provide the necessary forms and arrange for inspection. The Director or his designated representative must conduct the inspection. Inspection forms shall be made in triplicate, with one copy being retained by the club, one retained by the Director, and one forwarded to NFAA Headquarters.
4. The NFAA Director or his/her delegate shall be reimbursed at the current NFAA rate by a club/shop or association for travel incurred to inspect their course/range.
5. After inspection has been made, the NFAA Director or his delegate has been reimbursed for travel incurred, and the completed forms have been reviewed and signed by the NFAA Director or his designated representative, they shall be forwarded to NFAA Headquarters, together with the \$15.00 course approval fee. This fee covers either an outdoor range approval or an indoor range approval. The club/shop shall then be issued the appropriate course rating certificate(s).
6. If course approval is completed within a month period from the effective date of new charter, no fee will be required for the initial approval.
7. Course approval shall expire two years from the date of issue except when a change is made in the course, or a higher rating is desired. In each instance, a new course approval must be obtained. Procedures as outlined in subsections 3 and 4 of this section must be followed. The \$15.00 course approval fee will apply.
8. The Club secretary, Association secretaries or Shop Owner/Manager shall be notified by NFAA Headquarters four (4) months prior to expiration of their course approval. If successful inspection and approval has not been completed prior to the date of expiration, the NFAA Executive Secretary shall notify the Club Secretary, Shop Owner/Manager, the State Association Secretary and the NFAA Director that the range is no longer an approved range.
9. Course approval may be withdrawn at any time when, in the opinion of the NFAA Director, a condition falls below the standards for the rating awarded.
10. Revocation or expiration of course approval shall mean that no NFAA sanctioned events may be conducted on the course.
11. NFAA Star Rating: To receive a rating of ONE STAR, a course must meet all the requirements listed in 13 below. A one star course rating represents compliance with minimum requirements. A one star course rating is not considered satisfactory for tournament competition. No tournaments can be registered and no NFAA awards allowed for any scores shot on a one star course.

A TWO STAR COURSE rating will require compliance with 12 and 13 below, plus the requirements of 70 BONUS points from 14 below.

A THREE STAR COURSE rating will require compliance with 12 and 13 below, plus the requirements of 190 BONUS points from 14 below.

A FOUR STAR COURSE rating will require compliance with 12 and 13 below, plus the added requirements of 250 BONUS points from 14 below.

A FIVE STAR COURSE rating will be granted to any four star course provided there is at least one 14 target unit which readily lends itself to TV filming, plus the added requirements of 300 bonus points from paragraph 14 below.

A TV RANGE should be more than a regular roving range. It should lend itself to TV filming in a manner, which would allow the cameraman to cover more than one group or target at a time. It should be at least one 14-target unit. Several recommended configurations of a TV range would include:

11.1 Target shot of a road, trail or field where the shooter shoots the target and returns to the road/trail/field.

11.2 Targets set in a semi-circle, straight line or "V" configuration in a field.

The TV portion of the range may be the complete range or, if part of a larger range (such as 14 or 28 targets) should be an integral part recognizable as such.

Course rating of TWO, THREE, FOUR, and FIVE stars makes the course eligible for tournament competition, registration, and NFAA awards. The optional Cub and Animal Round shooting positions as well as Youth shooting positions, when present, must be up to standards and become a regular requirement of the inspection.

12. Course Layout Requirements:

12.1 Distances used shall be those given in the current edition of the NFAA By-laws.

12.2 All distances shall be correct and no deviation is permitted. Inspectors will check any distance in question with a tape or other means. The clubs shall tape all targets from shooting position to target butts.

12.3 All butts must be stable so there is no danger of tipping. If such a chance exists, then they must be braced or anchored.

12.4 Shooting lanes must be cleared so that the lightest bows can shoot an arrow to the target without being deflected.

12.5 Any person, regardless of height, must have a clear view of the full face of the target.

12.6 If the target is not backstopped, one-half the target distance shall be cleared behind the butt. If backstopped, or ditched, then the area to such back-stop shall be cleared so that arrows may easily be found.

12.7 Area one-fourth the shooting distance shall be cleared in front of the butts.

12.8 Paths between targets should be clearly marked and clear enough for easy walking with no obstruction, preferably so that archers can walk two abreast. If the inspector has any difficulty finding their way, this must be remedied. Paths should preferably be at the side of the shooting lane.

12.9 Shooting position shall be marked with target numbers, or separate target number marker shall be present and shooting stake color uniformity; Field-White, Hunter-Red, Animal-Yellow, Cub-Black, Youth-Blue.

12.10 Bales or butts must not leak arrows. They shall not be reinforced with any material that will damage arrows.

12.13 The course shall provide appropriate rest room facilities. It is most desirable that these rest rooms should meet the minimum requirements provided by the laws of their state or townships. Such requirements can be obtained from the local county Board of Health. Due to the condition of many of these facilities, city or county Board of Health affidavits should be required. A privy law is on the books of every state of the nation. Each city, county and township also has its own requirements and very often is more strict than the state's.

13. Safety Requirements:
 - 13.1 No course shall receive approval until all safety hazards, in the opinion of the inspector, are removed.
 - 13.2 No paths leaving targets shall go directly behind butts.
 - 13.3 If target butt is situated so that any path, target, road or building are behind at any reasonable distance, then the target must be provided with an adequate backstop.
 - 13.4 Practice area must be placed so that no paths or roads pass a reasonable distance behind practice butts. e) Practice area shall be treated as a giant sized target, and so cleared and backed.
 - 13.5 A minimum ranging from 25 feet to 50 feet must be provided between any paths or shooting lanes paralleling another shooting lane. This minimum range permits tolerance to be used, depending upon terrain, length of shot, and any distance used must preserve absolute safety.
 - 13.6 Distance on either side of a target to be free from archers shall range (depending upon conditions and length of shot) from 15 to 30 degrees from the shooting position. Example: For a 40-yard target; 120 feet, tangent 30 degrees, equals 120 X (0.57735) equals 68 feet clear distance on each side of the butt (about 23 yards). (If 30 degrees is used, then factor is always 0.57735). This does not mean all clear, but only that no shooting positions, waiting areas, etc., be located in this area.
 - 13.7 No target shall be situated on top of a hill where a miss becomes virtually a flight arrow.
 - 13.8 SAFETY REQUIREMENTS FOR INDOOR ARCHERY RANGES:
 - 13.8.1 All pillars or structural parts of the building, including automatic equipment, which in the eyes of the inspector would present an undue hazard shall be properly protected so as not to damage arrows and to prevent rebound to the shooting lines.
 - 13.8.2 The area behind the target butt shall be protected so as not to damage overshot or side-shot arrows. The backstop material shall extend to a minimum height of 8 feet from the floor.
 - 13.8.3 Bow racks and other accessories shall be of a design and position so as not to create a hazard to either equipment or personnel.
 - 13.8.4 Automatic butts returning with arrows imbedded shall stop without creating a hazard to archers on the shooting line (between 30 to 36 inches from the line).
 - 13.8.5 Ranges with movable equipment shall have a warning system in the event anyone should advance to the target. Once a participant has passed the shooting line in the direction of the target, the alarm system will activate. Alarm systems may be bells or horns audible to the entire range.
 - 13.8.6 Walk-up ranges shall have a sign posted stating that no one shall advance to the targets until an appropriate signal is given. The signal may be a switch-operated device or a manual signal. The sign shall be conspicuous from the shooting stake. No size required.
 - 13.9 STANDARDS FOR INDOOR ARCHERY RANGES:
 - 13.9.1 Target butts may be made of straw, excelsior or any other material which in the eyes of the inspector would not be damaging to the arrows and yet provide suitable stoppage.
 - 13.9.2 Butts shall not be made of material which, in a short time, will allow the passage of arrows.
 - 13.9.3 At any time butts begin to allow pass-through arrows, the condition shall be corrected at once.
 - 13.9.4 Each butt shall be large enough to carry the needed target faces for the round being shot. Each shall have sufficient backing without overlapping one another. The minimum size shall be 40" square or 48" in diameter. A

deviation in minimum size will be permitted in those club-type operations where each archer is assigned his own butt providing it is large enough to fully support a 40-cm. target face.

- 13.9.5 There shall be at least one face (or set) on the butt for each archer shooting on that line.
 - 13.9.6 The distance from the floor to the bottom of the butt shall be 16" minimum.
 - 13.9.7 Ceiling to floor distance shall be a minimum of 8'6". Each shooting lane shall be 24" minimum.
 - 13.9.8 Movable equipment shall be capable of stopping the target at the following distances, plus or minus 4", 20, 15 and 10 yards. 55, 50, 40, 35, 25 and 20 feet.
- 13.10 LIGHTING FOR INDOOR ARCHERY RANGES:
- 13.10.1 The illumination on the target shall be situated and placed so as not to allow the light rays to be directed toward the shooting line. At no time will direct light rays be allowed to be in view of the archers so as to disturb his/her shooting.
 - 13.10.2 The acceptable amount of light on the targets has been established at 30 foot candles. Indoor ranges should maintain a 30 foot candle lighting illumination.

The Executive Secretary of the NFAA may allow deviations to certain rules listed herein except those listed under safety on the recommendation of the inspector. Any such deviations allowed shall be stated on the approval certificate on display.

NFAA POLICY SECTION

GENERAL POLICY

BDC-8-1980 Clarification, “The written word and not the intent be used to interpret the Constitution and By-laws items.”

1984 Definition: The NFAA Directors asked the Council to define residence and the following is the definition that they agreed upon. “Resident as applies to NFAA Membership shall be declared by individual applying for membership in the NFAA.”

1988: Suggestions for Laying out a Permanent Bowhunter 3-D Range:

1. Lay out your range so that you have a minimum of 10 to 30 yards more than the shortest distance you would want to shoot. Put a permanent stake where your target will be placed. This will allow you to vary between tournaments or rounds and still stay within the safety requirements of the NFAA.
2. Check the above safety requirements from the longest shooting position possible. This will assure our staying within the requirements at any distance.
3. By using either the interrupted linear or the interrupted continuous layouts, you can see the amount of shooting positions which are possible. Because of the construction of these ranges, shots can be made from many angles to the target, from the trail and up to the target. In the continuous direction range, must be strictly adhered to.

1991: Outdoor National tournament

The National Outdoor Tournament will be awarded on a rotational basis, when possible, between the West, Mid and East United States areas. If no bids are received for a given year, the next region in line will be accepted. Rotation will also be affected if the bid is considered not to be acceptable. This action to be effective in 1992.

2006: Outdoor National Tournament

The preferred format for the Outdoor National Tournament shall be five days, Monday through Friday, with flights determined after the second day. Where an acceptable five day host club bid is not available, the NFAA Council will consider a host for a three day format, with flights determined after the first day.

2006: Effective 2008: The Outdoor National Tournament will be a 3/5 day format, Wednesday through Sunday. Rounds will be Field, Hunter, Animal, Field, Hunter, in that order. Five-day shooters will shoot all five days, and count only their better Field and better Hunter Round scores. Three-day shooters may register for first three, middle three, or last three days. Archers must register for the days they will shoot.

1994: Certified Instructor and Master Coach Clinics

The certification of all NFAA Certified Instructors and Master Coaches received after February 1994 will expire 10 years from the date of issuance. Those Instructors and Master Coaches certified prior to February 1994 shall retain their certification for as long as they remain NFAA members.

All Certified Instructors and Master Coaches certified after February 1994 must re-certify every 10 years by attending another clinic, within one year of their expiration date.

If at any time an individual lets his/her NFAA membership expire his/her certification as a Certified Instructor or Master Coach will also expire, and re-certification will be required. Note: To re-certify his/her NFAA certification, the person must renew their NFAA membership and observe a CI class or clinic. Reinstatement can also be obtained with permission of the CI committee without attending another CI clinic, provided that the course has not changed significantly and all membership fees, both national and state that were in arrears, are paid in full, since the time they were allowed to lapse.

MARKED OR UNMARKED INSPECTION REQUIREMENTS

Safety requirements:

1. No course shall receive approval until all safety hazards, in the opinion of the inspector, are removed.
2. All range inspectors **MUST** be members of the NFAA.
3. No paths leaving target shall go directly behind targets.
4. If target is situated so that any path, target, road or building is behind at any reasonable distance, then the target must be provided with an adequate backstop.
5. Practice area must be placed so that no paths, roads, pass a reasonable distance behind practice butt. Practice area shall be treated as giant sized target, and so cleared and backed.
6. Targets should be placed in shooting lanes to simulate hunting conditions, but at the same time these shots should be good, clean (not clear) and safe shots. Remember, realistic bowhunting practice shots.
7. If an arrow is lost, the archer may search for their arrow a maximum of 25 yards behind the target. The shooter should place their bow across the shooting lanes in plain sight, or stand their bow in front of the target butt and/or 3-D animal.
8. A minimum distance ranging from 25 to 50 feet must be provided between any paths or shooting lanes paralleling another shooting lane. This minimum permits tolerance to be used, depending upon terrain or length of shot. Any distance used must preserve absolute safety.
9. A minimum of 50 yards must be provided behind the target. An appropriate backstop may be substituted.
10. Distance on either side of a target, to be free from archers, shall range (depending upon conditions and length of shot) from 15 to 30 degrees from the shooting position. [Example: For a 40 yard target, 40 yards times tangent of 30 degrees (0.57735) equals about 23 yards clear distance on each side of target butt.] This does not mean all clear, but only that no shooting positions, waiting areas, etc., be located in this area.
11. No target shall be situated on top of a hill where a miss becomes virtually a flight arrow.
12. It is mandatory that on a Bowhunter/3-D range, the range inspector must be provided, at the time of inspection, with a map of the range layout which will be used for the inspection. Also if an accident occurs during the shoot this may be used for Insurance purposes. A map shall show distances, direction, targets and shooting positions.
13. Archery range safety warning signs shall be posted on all approved NFAA 3-D ranges at the inspector's discretion.
14. If simulated moving targets are incorporated into the range they will be operated from behind the shooting position.

The Round

The archer will shoot 3 arrows at each of the following distances at the targets noted. There are 10 targets per half, 20 per round; for a total of 60 shots (same as indoor). Possible score = 300 + 60 X's.

The 30 cm target will be used at the following distances: 20, 25, & 30 yards.

The 45 cm target will be shot at the following distances: 35, 40, 45 & 50 yards.

The 60 cm target will be shot at the following distances: 55, 60 & 65 yards.

Similar to the field round, archers shall shoot from opposite sides after the first half (i. e. left to right and vice versa). Also, the first shooters will shoot bottom targets (on the 30 cm faces), the second shooter(s) shall shoot top targets and change at the half.

4 target faces will be available to shoot whenever the 30 cm size is used. A single target face is used at all other distances, with the option of double-targeting the 45 cm faces.

*This size face was initially developed in case this target would some day be considered as a replacement of the current field faces.

Option #2:

These targets could be adopted to replace the current field round targets.

1996: Combination 3-D Animal and Field or Hunter Round

1. STANDARD UNIT:

This round is to be shot on existing 14 unit field, hunter & animal ranges. It will consist of 7 marked 5/3 or 5/4/3 field or hunter targets and 7 3-D unmarked distance animal targets.

2. Targets:

The targets will be put out on the existing range in the following manner; it makes no difference in what distance sequence the range is laid out. The first target will have either a field or hunter face. This will be at the discretion of the tournament chairman. The second target will have a 3-D animal target. The animal target will be set in a direct line at an unmarked distance somewhere between the furthestmost animal stake and the existing target butt. The target is to be set in this direct line for safety purposes. Target number three will again be either a field or hunter target. Target number four will be another 3-D animal set as described above for number two. This rotation sequence between field or hunter and 3-D animal targets will carry out through the 14 target unit, or 28 target unit, however the range is laid out.

3. Scoring:

3.1 When shooting either the field or hunter targets, you will shoot four arrows from the stakes that you would normally shoot that particular target from. Scoring each arrow either a 5/3 or 5/4/3/ just as you would in a field or hunter round.

3.2 When shooting the 3-D animal targets, you will shoot two arrows from the furthestmost animal stake. You will score both arrows. Scoring will be 10 for a kill and 8 for a wound.

- 3.3 In using the above scoring system it will be possible to shoot a perfect score of 280, which is comparable to the scoring system for our three existing 14 target units.

1996: Pee Wee Classification

1. This classification is established for archers under 8 years of age and is optional at State and Club level. This division will not apply to Sectional and National levels.
2. Pee Wee shooting positions shall be marked with green stakes.
3. The Pee Wee's handicap must be established entirely on the Pee Wee course and is not applicable to or from any other course.
4. Pee Wee official target units shall consist of :

RIC 2005-1

INCIDENT OR QUERY

The California Director was asked if a hand held clicker would be legal in competitive bowhunter.

The archer draws the bow, then squeezes the clicker till it sounds, then releases the arrow.

DIRECTOR'S RULING/INTERPRETATION

The Director ruled that it is not legal to use a clicker in Competitive Bowhunter.

RIC RULING

RIC agrees with the California Director.

RIC 2005-3

INCIDENT OR QUERY

At the Midwest Sectional Tournament, an archer requested a free membership in the Pro Division as per the new rules for new applicants to the Pro Division.

DIRECTOR'S (PROTEST COMMITTEE) RULING/INTERPRETATION

The Tournament protest committee ruled that since the rules state that an invitation to an applicant for a free membership in the Pro Division is needed, and none had been sent, that the applicant had to pay the Pro Dues to compete in that division.

RIC RULING

RIC agrees with the protest committee that the applicant must pay the Pro dues until receiving an invitation from the Pro Division for one year's free Pro membership.

Note: RIC rulings on **RIC 2005-2**, **RIC 2006-1** and **RIC 2006-2** were all overturned by the NFAA board of Directors
